EXPERIENCE

Sentry Insurance – **Software Developer** May 2025 – Present

Hours per week: 40

- Co-led data migration initiative from an acquired insurance company's Salesforce environment to Dynamics 365 and internal applications, ensuring data integrity and continuity across enterprise systems
- Integrated fraud detection flags into Amazon Connect to block payments with known fraudulent methods by updating AWS Lambda functions, Lex bots, and Contact Flows
- Implemented a policy archival service in ASP.NET to extract policies from Microsoft CRM, store them in Amazon S3, and enable PDF report generation to retrieve and format archived policies
- Built a service in ASP.NET to extract and map agency data from an internal system into Microsoft CRM, using parallel processing to optimize performance and reduce data transfer time

Sentry Insurance – ***Associate Software Developer (Coop/Intern)*** *May 2022* – May 2025

Hours per week: 15

- Converted Excel reports manually edited by business teams to a Java Spring MVC webpage that displays the same data pulled from an SQL server database, saving 700+ hours annually
- Developed React components using JavaScript/Typescript for a Dynamics 365 application for customer service agents to use when interacting with customers
- Designed a scalable service using Docker, Jenkins, and Spring Boot 3 to host multiple REST APIs for internal websites, fetching and processing data from an SQL Server database
- Collaborated in Agile Scrum teams, participating in sprint planning, stand-ups, and retrospectives

Air Force National Guard – ***Maintenance Analyst (Secret Clearance)*** April 2019 – April 2025

Grade/Rank: E-5 (Staff Sergeant) | Hours per week: 10

- Deployed to Saudi Arabia, tracking information supporting operations Spartan Shield and Inherent Resolve in over 500 combat sorties and 8,000+ maintenance actions
- Analyzed F-35 and F-16 aircraft data to identify trends impacting missions, delivering insights and visual reports to leadership
- Trained junior and senior personnel on 3, 5, and 7 level maintenance analyst tasks, ensuring consistent proficiency and mission-ready skill development across the unit

EDUCATION

University of Wisconsin – Madison January 2021 – May 2025

B.S. In Computer Science, certificate in Data Science

GPA: 3.64

PROJECTS

- Badger Solar Racing Club: Reduced CPU consumption of the chase car dashboard by 80% using FastAPI and optimized JavaScript-driven React components
- Web Scraping Script: Python script to gather realtor data in Chicago, automating 40+ hours of manual work
- Run Planning Web Application: Django web application generating running routes based on user input using Strava and Mapbox APIs, with an SQLite database

LANGUAGES/TECHNOLOGIES

- Java, Python, JavaScript, TypeScript, C, HTML, CSS, SQL, R
- React, Docker, Jenkins, Spring Boot, Node, Git, Mongo DB, SSMS, Snowflake
